

Honeycomb matting

An excellent choice of mat in two formats. Both have a honeycomb open finish to allow water to pass through safely, whilst giving the user superb comfort underfoot, and reducing cold transfer from the floor. These are non-slip, anti-fatigue mats for any purpose, the left hand mats having a clip together edge built in to form a bigger area if required, with a clip on bevelled edge available if required, whilst the right hand side mat has a pre-formed bevelled edge to reduce the risk of accidents. The red mat is particularly used in kitchen areas due to its increased resistance to greases.

Polymer Type: NR/Blend
Hardness: 60°
Density - SG: 1.4
Tensile Strength: 3.0 MPa
Elongation at break: 250%
Abrasion Resistance: 250 mm³
Temperature Resistance: -20/+70°C
Thickness:- 13mm

Mat Sizes:- 915mm x 915mm, 1520mm x 915mm.

Colours:- link Black, red. Bevelled mats Black only.

Left hand product can be supplied with clip on bevelled edges if required.
