

## Medium & Heavy duty suction/delivery hose PVC

Three popular choices for use with pumps, movement of slurry, mud, & general water movement. The medium duty green "canaflex" hose is widely used across a range of industries, particularly in agriculture. The grey hose is a heavier duty version. The grey/green hose is a blend of the two hoses, giving strength, added together with a softer pvc to give more flexibility, often seen in straight lengths down the sides of tankers.

### Medium/Heavy Duty PVC Suction & Delivery (green or grey)

**Tube :- Green or Grey pvc**

**Reinforcement :- White Rigid PVC**

**Application :- Medium & heavy duty suction/delivery of water, slurry etc. Very popular for use in agriculture .**

**Temperature : -10 > +60 deg C.**

**Safety factor :- 3:1**

**Working pressure :- 4 - 5 bar dependent on inside diameter**

**Sizes available -19mm 25mm 32mm 38mm 51mm 63mm 76mm  
102mm 127mm 152mm 203mm**

### Super elastic PVC Suction & Delivery (green/grey)

**Similar properties to the above but more flexible, making it easier to handle, particularly used in 6" diameter on the sides of tankers.**
